PROJECTS

Grocery	https://grocery-frontend-jade.vercel.app
Mern Grocery Website	<i>JavaScript, Css, React + Vite, Nodejs, Express, MongoDB</i>

- Frontend JavaScript library for building user interfaces, used to create the user interface of the website.
- Implement secure authentication mechanisms to ensure that only authorized users can access protected resources.
- Token-based Authentication: Use tokens, such as JSON Web Tokens , to authenticate users and manage their sessions securely.

Bakery	https://bakery-website-liart.vercel.app
Mern Bakery Website	<i>JavaScript, Css, React + Vite, Nodejs, Express, MongoDB</i>

- Frontend build tool used to bundle and optimize React components and assets.
- Display a list of available product with details such as name, price, description, and image.
- Creating Express.js routes, implementing authentication, integrating with MongoDB.

Add to Cart	https://react-add-to-cart-one.vercel.app
React Add To Cart	<i>JavaScript, Css, React, Jsx, React Router Dom</i>

- Design a user interface where users can view products and add them to the cart.
- Attach an event listener to the "Add to Cart" button to trigger the function that adds the product to the cart.
- Serialize the cart data to JSON and store it in the local storage. Retrieve and parse it when needed.

Recipe Api	https://recipesearchapi.vercel.app
Recipe Search App	<i>JavaScript, Css, Html</i>

- Provide a search bar where users can enter keywords or filters to search for recipes.
- Send requests to the API with the user's search parameters and retrieve recipe results.
